SAFE, DYNAMIC AND RIDER-FRIENDLY

SPORTFORCE+

- Fast and easy steering, high corner stability.
- Consistent performance through its lifetime.
- SPORT FORCE+ special compounds have been developed to guarantee the best riding performance and perfect wear balance. The combination of S-SBR elastomers, the fillers and other special additives in interaction with the tread pattern, construction and reinforcement materials, all of these improvements result in maximum road grip for varied riding conditions and optimized service life. Special additives developed by raw material suppliers ensures high level of grip at low temperatures and fairly constant riding characteristics throughout the service life of the tire.

MITAS TIRE MARKINGS FOR MOTOCROSS AND EXTREME ENDURO TIRES

RED STRIPE – tires for motocross competition, training and hobby riding

WHITE STRIPE – tires for winter use and winter motocross

YELLOW STRIPE – tires with softer compound suitable for enduro FIM and cross country competition

GREEN STRIPE – tires with softer carcass and soft tread compound suitable for hard enduro competition

DOUBLE GREEN STRIPE – tire with softer carcass and extra soft tread compound suitable for extreme hard enduro competition

C-29

XT-946

ICE SOFT

Soft tread compound built on a flexible casing delivers excellent performance over rugged terrain. Tire performs like a radial trials tire with knobs.

EF-07 SUPER (MARKED WITH YELLOW STRIPE) Yellow tread compound is resistant to tearing and cutting and is suited to a wide range of terrains from soft and intermediate to rocky conditions. The casing is stiffer than the green stripe version. For sport and enduro competitions.

EF-07 SUPER LIGHT (MARKED WITH GREEN STRIPE)

Green stripe has a slightly softer tread compound than yellow stripe. Lightweight flexible casing with a reinforced shoulder for a large contact surface and good shock absorption. Compound resists tearing and cutting and is suited for tough to extreme off road conditions.

WINTER FRICTION STUDDED TIRES

For the last decade Trelleborg MX Motorcycle tires have been produced by Mitas in the Czech Republic using molds and technology purchased from Trelleborg Sweden. 2010 was the last year of the brand name licensing agreement. The Trelleborg name use in the motorcycle tire market has now

ended. The identical MX tires continue to be manufactured by Mitas in the Czech Republic and marketed using the Mitas brand name. The original tread model numbers remain but will now be preceded by an "X" as part of the Mitas "Sport Extreme" off-road motorcycle tire product line. Not for highway use.

ICE KING TIRES

Extra thick carcass accepts up to 1.5" screws in the rears and up to 1.25" screws in the front tire.

No need to add a liner - this tire has the liner built into the casing.

Custom low-temp compound resists tearing for excellent screw retention.

Easy to mount with standard tire mounting tools. Can be built in various screw patterns. Screws are not included. NHS – not for highway service.
