SPORT FORCE+ EV (Evolution)

The new "EV" version builds on the strong casing and sport grip of SPORT FORCE+ and takes the tire's performance to a higher level. Designed for very fast, easy and precise steering, Mitas SPORT FORCE+ EV (meaning Evolution), ensures maximum control in extreme lean angles thanks to its large surface contact area, casing design and gripping materials. Featuring Multi Compound Tread Technology and incorporating completely new tread compounds, the SPORT FORCE+ EV delivers high grip when cornering and improved performance accelerating out of power corners and rapid, confident braking.

SPORT FORCE+

SPORT FORCE+ is designed for those riders of sport, traditional and Supermoto motorcycles who are looking for a dynamic and confidence inspiring road ride. Riders will appreciate quick handling with maximum control at extreme lean angles. On long straights, Sport Force+ delivers precision feedback and confident stability. Silica compound provides maximum road grip in various weather, temperatures and tarmac conditions. You can expect consistent tire performance throughout the service life of the reliable grip.

SPORT FORCE+ RS (Race Soft)

For fast and confident performance, Mitas SPORT FORCE+ RS (meaning Racing Soft), delivers the highest racing performance expected from this type of tire: amazing grip, good edge control and casing feedback. The newly developed Racing Soft compound guarantees outstanding performance on dry racetracks at different air and track temperatures.

20-8076	140/70ZR17 66W Rear	\$199.95

TOURING FORCE

TOURING FORCE is designed for riders of sport touring motorcycles, including heavy touring (GT) motorcycles and Adventure motorcycles being used on the road, that are seeking a comfortable and confident ride. A perfect fitment for longer road trips with a passenger and luggage, as well as for riders who prefer sportier and more dynamic solo rides. Riders will benefit from extended mileage, enhanced wet grip, and handling stability on straights throughout the grip life of the tire. Different compounds, advanced elastomers, highly active fillers and silica have been developed to guarantee high mileage and confident grip at the same time.

DAKAR = Stronger carcass for extreme rally and longer adventure trips (+one extra textile ply). Yellow stripe.

DOT Approved

Adventure and dual sport

E-13 RALLY STAR

- Tread pattern for the front wheels recommended for various types of terrain
- E-13 Front has a softer carcass and soft tread compound marked with a green stripe.
- Tube Type only, must use with a tube
- Developed as a set with E-12 RALLY STAR to meet the demands of rally competition.

PART#	E-13 RALLY STAR	RETAIL
20-7702	90/90-21 54R TT	\$139.95

TT = Tube Type, must use with a tube.

E-12 RALLY STAR

- Developed to meet the demands of tough rally competitions including Dakar and other all-terrain challenges
- Larger block pattern and more open tread offers fantastic grip and extended wear life
- E-12 RALLY STAR has a lighter carcass marked with a green stripe.

PART#	E-12 RALLY STAR	RETAIL
20-7701	140/80-18 70R TT	\$219.95

TT = Tube Type, must use with a tube.

C-17 STONEATER

- Great choice for aggressive off-road riding, especially on gravel or rocky terrain
- Tread pattern for the front wheels of adventure motorcycles.
- "Dakar" version (Yellow stripe): Tire with a stronger carcass and higher puncture resistance. Suitable for higher loads, longer adventure trips and extreme conditions
- Tube Type only, must use with a tube

20-7657	90/90-21 54R TT	\$98.95

Adventure and dual sport

Mitas E-07+ is ideal for riders looking for a multifunctional adventure tire with the best mileage durability in its segment for on-road rides but still able to travel difficult off-road sections. The rounder profile, compared to the original E-07, ensures great maneuverability and cornering stability, while the aggressive chevron pattern helps disperse water, soil and mud from the surface even in the most extreme conditions. The tougher casing DAKAR version (Yellow stripe marking) ensures extra mileage compared to the standard version and has a reinforced, higher puncture resistance carcass suitable for heavier loads, longer adventure trips and extreme conditions.

The compound of the standard version (non-DAKAR) is more suitable for wet road surfaces. Tubeless, must use a tube on a tube type rim.

PART#	E-07+ FRONT	RETAIL
20-7583	110/80B19 59T	\$143.95
20-7584	110/80B19 59T DAKAR	\$155.95

E-07+

ROAD 60 40 OFF ROAD

FAQ ABOUT THE E-07 AND THE E-07+

Can I combine E-07 and E-07+?

The E-07+ is fully compatible with the E-07. They can be fitted as a pair.

Can I mount the E-07 and or the E-07+ on a tube type rim?

Yes, when mounted on a tube type rim, new inner tube must be used.

Can I combine the standard and the DAKAR versions?

To ensure optimal riding performance, we recommend using the same version on the front and the rear wheel. However, if you would like to combine the standard and the DAKAR versions we advise that you fit the standard version on the front wheel and the DAKAR on the rear wheel.

ROAD 50 50 OFF ROAD

E-07

Mitas E-07 continues to be one of the most desirable choices of adventure riders since it allows a combination of road riding performance and wear with more adventurous off-road trips. Due to its long wearing compound and optimal performance on and off-road, the E-07 remains a preferred choice on many journeys across the world. Selected sizes are available in the Dakar version (Yellow stripe marking): Tires with a stronger carcass and higher puncture resistance. Suitable for higher loads, longer adventure trips and extreme conditions. The compound of the standard version (non-DAKAR) is more suitable for wet road surfaces.

XT-754 Super Light Green

Extremely aggressive tread design. It does not cut or tear knobs. High-profile knobs that dig deep. Exceptional traction on many types of terrains. Semi-soft and long-lasting compound along with a supple casing makes the XT-754 Green stripe a proven performer. NHS (Not for Highway Service)

XT-946 Ice Soft

Soft tread compound built on a flexible, supple casing delivers excellent performance over rugged terrain. Tire performs like a radial trials tire with knobs.

Enduro / Cross Country Extreme Tires

TERRA FORCE-MX SM Enduro rear is a new generation of the popular C-18 tire line. It is designed for enduro competition and cross country racing. Ideal tire for various off-road terrains – from soft medium (Super Light-green) to intermediate and medium hard (Super-yellow). An opened spaced knob design contributes to great self-cleaning ability in mud or sand while side knobs with a hooked profile support acceleration. DOT approved.

NEW MOUSSE

Mitas Mousse was developed to fit perfectly the air chamber shape and volume of Mitas motocross, enduro, extreme enduro and rally tires. Development and testing was performed by top off-road riders on various types of terrains.

Mitas Mousse is available in several 18 to 21 inch sizes and three different versions:

- Standard version for motocross and cross country
- Soft version for enduro and extreme enduro
- Extreme version for technical extreme enduro sections
- NHS - Not for Highway Service

MITAS Tire Markings for Motocross and Extream Enduro Tires

- Dakar - Tire with a stronger carcass and higher puncture resistance. Suitable for higher loads, longer adventure trips and extreme conditions.
- ■ Motocross competition tire made from the hardest tread compound for soft and sandy terrain.
- ■ Motocross competition tire made from a medium hard tread compound for soft to medium terrain.
- ■ Motocross competition tire made from a softer tread compound for medium to hard packed dirt terrain.
- Tire for Pit Cross
- Super - Tire made with a softer carcass for Enduro FIM and cross country competitions. Since in these races cover a variety of terrains from soft to hard, a medium hard compound is used to deliver performance on different surfaces.
- Super Light - Tire with a softer carcass and soft tread compound for extreme enduro or cross country competitions on harder terrains.
- ■ Super Soft - Tire with a softer carcass and extra soft tread compound for rocky terrain and most demanding extreme enduro competitions

Winter Friction Studded Tires

For the last two decades Trelleborg MX Motorcycle tires have been produced by Mitas in the Czech Republic using molds and technology purchased from Trelleborg Sweden. 2010 was the last year of the brand name licensing agreement. The Trelleborg name use in the motorcycle tire market has now

ended. The identical MX tires continue to be manufactured by Mitas in the Czech Republic and marketed using the Mitas brand name. The original tread model numbers remain but will now be preceded by an "X" as part of the Mitas "Sport Extreme" off-road motorcycle tire product line. Not for highway use.
